Test

Controls width of Hi-Res output

Controls Height of Hi-Res output

Controls image resolution of Hi-Res output

Locks width and height together so they both scale together

Seperates alpha channel for transparent backgrounds

Change exported ICC profile

No Embedded Profile
AdobeRGB1998
✓ AppleRGB
ColorMatchRGB
eciRGB_v2
WideGamutRGB

Change export to Standard (OpenGL) or Raze Raytracer

Changes sample amount (Higher = Better Quality)

Hides the Rear Facing labels so they are not visible upon rendering. Allows hiding for opsis, hi-res, and animation.

NEW

Saves settings into the Presets menu for future use

Uses camera preset list for multiple view exports

Uses default zoom on document

Uses zoom factor on file in place of default

Forces camera into fit to view

Closes Hi-Res export window

Suppress all warnings

Exports to Render Manager (Make sure your settings are right!)
